DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. § 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The prior art cited in the information disclosure statement filed on August 22, 2003 has been considered. The document number of two of the cited patent documents was incorrect. The examiner has corrected the document numbers on the submitted FORM PTO-1449.

Additional Prior Art

Yokoi (US 6,459,484 B1) disclose an apparatus for selection and detection of at least two spectral regions of a light beam, comprising means for spectral spreading of the light beam (44); focusing means (43) for focusing the spectrally divided light beam into a focus line; means (88a, 88b), modifiable in their position parallel to the focus line, for reflecting a first and a second spectral region and a detection device that encompasses means (91a, 91b) for detecting the reflected first and second spectral regions. See Fig. 15 of Yokoi.

Claim Rejections - 35 USC § 112, 1st paragraph

The following is a quotation of the first paragraph of 35 U.S.C. § 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-20 are rejected under 35 U.S.C. § 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Art Unit: 2877

The written description of the invention is silent with respect to how the first region blocked by the modifiable means is detected by detecting means of the detecting device, as set forth in lines 9 and 10 of independent claims 1 and 16. How does the blocked out first spectral region reach the detecting means for the detecting device? Clarification is required. No new matter should be entered.

Claim Rejections - 35 USC § 112, 2nd paragraph

The following is a quotation of the second paragraph of 35 U.S.C. § 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 14 is rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The use of "can be" bridging lines 1 and 2 of claim 14 renders the claim and any claim dependent therefrom indefinite.
